

About Us

Lakeside Outreach School is located in the northern Alberta town of Slave Lake, within the Municipal District of Lesser Slave River. Our town is located 257 km north of Edmonton on the southeast shore of Lesser Slave Lake at the junction of Highway 2 and Highway 88.

Our school offers an alternative learning environment with programming which is individualized, flexible and delivered within a small, personal setting. There is a student population base of approximately eighty students in grades ten to twelve, including students who are blended from other local high schools.

Principal's Message

We have a great team at Lakeside Outreach School, including two teachers, a career coach, learning support teacher and wellness coach, with access to other divisional resources as needed. It is important to this team that all students feel welcomed, cared for, respected and safe when they are at our school, and that students have access to quality learning that most effectively meets their needs. Lakeside Outreach School offers an alternative learning environment with individualized, flexible programming within a small, personal setting for those students whose needs (educational, psychological, social, or employability) may not be met in a traditional school setting. We also take pride in community relationships and partnerships we have established in our local area, and with the parents and guardians of our students. We encourage open and on-going communication between home and school.

Vision

Our vision is to forge strong, positive connections with students so they can achieve independence, build confidence, and gain academic knowledge.

Mission Statement

Through exemplary teaching, leadership, and collaborative partnerships, we prepare students to be socially responsible and to succeed locally and globally.

Staff List

Kristoffer Herbert	Principal
Christopher Gardner	Vice Principal / Teacher
Lyndsay Baird	Teacher
Theresa Rachar	Office Administrator
Courtney Harrington	Wellness Coach
Monica Edwards	Career Coach
Robyn Hollohan	Learning Support Teacher
Alixandra Roca	Provisional Psychologist

Notes:

1. Data values have been suppressed where the number of respondents/students is fewer than 6. Suppression is marked with an asterisk (*).
2. Participation in the 2019/20 and 2020/21 Diploma Exams was impacted by the COVID-19 pandemic. In the absence of Diploma Exams, achievement level of diploma courses were determined solely by school-awarded marks. Caution should be used when interpreting high school completion rate results over time.
3. The "N/A" placeholder for the "Current Result" for PAT and Diploma Exam measures are included until results can be updated in the Fall.
4. Aggregated PAT results are based upon a weighted average of percent meeting standards (Acceptable, Excellence). The weights are the number of students enrolled in each course. Courses included: English Language Arts (Grades 6, 9, 9 KAE), Français (6e et 9e année), French Language Arts (6e et 9e année), Mathematics (Grades 6, 9, 9 KAE), Science (Grades 6, 9, 9 KAE), Social Studies (Grades 6, 9, 9 KAE).
5. Participation in the Provincial Achievement Tests and Diploma Exams was impacted by the fires in 2016 and 2019, as well as by the COVID-19 pandemic in 2020 and 2021. Caution should be used when interpreting trends over time.
6. Aggregated Diploma results are a weighted average of percent meeting standards (Acceptable, Excellence) on Diploma Examinations. The weights are the number of students writing the Diploma Examination for each course. Courses included: English Language Arts 30-1, English Language Arts 30-2, French Language Arts 30-1, Français 30-1, Mathematics 30-1, Mathematics 30-2, Chemistry 30, Physics 30, Biology 30, Science 30, Social Studies 30-1, Social Studies 30-2.

Comments on Results

A portion of the student population at Outreach schools are often transient and have multiple school enrollments over the course of a school year, while others are often blended from a local high school, completing courses at both schools. This affects the accuracy of the high school completion data that is being presented here. In addition, COVID-19 issues continued to have a negative effect on the learning environment for many students during the beginning of the 2020-21 school year. Lakeside Outreach School also operated without the full support of an Indigenous education coach to assist with cultural infusion, but teachers facilitated opportunities for students to share their culture and engage in cultural teachings through 'LSO's Jr. PD Days' initiative and other available opportunities. Formal enrollment structures and procedures were put in place during the 2021-2022 school year to help focus academic programming and strengthen communication between home, school and each of the wrap-around services connected to Lakeside Outreach School. These structures and procedures, such as meeting with an administrator before registering, a semestered program offering specific courses, and realistic course caps based on teacher allocation are expected to improve the high school completion rate going forward. Three students participated in a high school graduation ceremony through Lakeside Outreach School at the end of the 2021-2022 school year, while multiple other students graduated from Roland Michener Secondary School, who completed courses at Lakeside Outreach School as well.

Citizenship

Percentage of teachers, parents and students who are satisfied that students model the characteristics of active citizenship.

Comments on Results

While we saw another increase in overall satisfaction regarding student citizenship in 2022, and the number of respondents doubled, this data is still based on just twelve respondents. Surveys were sent out via email to all students and parents, and those who attended in-person were encouraged to complete them. Each month during the 2021-2022 school year, Lakeside Outreach School recognized a student 'Citizen of the Month,' based on their contributions to our learning community. These monthly awards were celebrated on social media and in student letters home, alongside any opportunities we had to connect our students to the community and bring community experts into our classroom. CTS learning experiences with themes reinforcing positive behaviour were also included as part of 'LSO's Jr. PD Days' initiative and CALM Blitz

Student Learning Engagement

The percentage of teachers, parents and students who agree that students are engaged in their learning at school.

Comments on Results

While we maintained the overall satisfaction regarding students who agree that students are engaged in learning at their school, and the number of respondents doubled, this data is still based on just twelve respondents. Surveys were sent out via email to all students and parents, and those who attended in-person were encouraged to complete them. During the 2021-2022 school year, Outreach teachers had to adapt to the closure of the Alberta Distance Learning Centre, which meant developing new ways for students to access and submit coursework, reworking courses and developing new assessments. This became an opportunity for our teachers to put in place more engaging learning activities, feedback methods and to bring more student choice into their required coursework.

Drop Out Rate

Comments on Results

Parent data is suppressed due to limited responses received, while student responses doubled to twelve this year when compared to last. With this increase in responses also came an 8% increase in percentage of students who are satisfied with the opportunity for students to receive a broad program of studies. This can be attributed to a dynamic and community-oriented physical education program, plenty of Foods' opportunities and the promotion of 'LSO's Jr. PD Days' initiative, alongside our core courses. Letters home to families and posts on social media advertise the credit opportunities we develop and partnerships with local experts we have established to bring authentic learning experiences to students.

Comments on Results

According to data collected from a sample of twelve students, Lakeside Outreach School continues to achieve very high to excellent results when looking at the percentage of teachers, parents and students in agreement that students are safe at school, are learning the importance of caring for others, are learning respect for others and are treated fairly in school. We consistently send out the message to our families about how important it is for our learning environment to be welcoming, safe, caring and respectful. Our school also collaborates with community organizations like Community Futures and Northern Haven Support Society to connect students to presentations on anti-bullying, healthy relationships and anger management. A school wellness coach, in addition to being available for one-on-one support meetings with students, pursues a universal approach to wellness at Lakeside Outreach School. This is accomplished by getting involved with various learning activities alongside students, organically conversing and advising about care and respect for self and others and formally presenting to students at learning events throughout the school year such as CALM Blitz and LSO's Jr. PD Days. The school's emergency response plan is reviewed with staff and students throughout the year, including practicing and discussing various safety drills. Lastly, qualities such as being caring and respectful are celebrated monthly through various awards presented at our monthly class celebration.

Comments on Results

Of the twelve students surveyed, 100% believe their school and schools in their jurisdiction have improved or stayed the same in the last three years. A lot of work during the 2021-2022 school year went into establishing more formalized, efficient and streamlined enrollment and communication processes.

There is now a clear pathway to register at Lakeside Outreach School via an enrollment meeting with the vice principal of the school, including the student and parent/guardian, to determine course availability, expectations and an academic program that will work for the student. For students at other High Prairie School Division schools who are interested in transferring or enrolling in one or more courses at Lakeside Outreach School, a clear pathway has also been established, that begins with the career coaches. In addition, Lakeside Outreach School has been working to broaden access to course materials through Google applications, using the knowledge gained from our experiences with At-Home Learning during the height of the Covid-19 pandemic, and out of necessity since the closure of the Alberta Distance Learning Centre. An increase in the frequency of virtual interactions by Lakeside Outreach School teachers and students occurred during the 2021-2022 school year. We have been able to meet the want of some families in this school division to continue with online learning, within the parameters of our course offerings. Lastly, physical improvements to the learning space occurred during the 2021-2022 school year. All of the old furniture was removed from the classroom after the pandemic restrictions were lifted, including damaged desks, and they were replaced with brand new round tables and chairs.

Comments on Results

A portion of the student population at Outreach schools are often transient and have multiple school enrollments over the course of a school year, while others are often blended from a local high school, completing courses at both schools. Some students only attend Lakeside Outreach School for a portion of their high school experience. This affects the accuracy of the high school to post-secondary transition rate data that is being presented here. In addition, COVID-19 issues continued to have a negative effect on the learning environment for many students during the beginning of the 2021-2022 school year.

Comments on Results

Grade 10 students completed the Ontario Comprehension Assessment (OCA) in the Fall only, during the 2021-2022 school year. A change in enrollment and attendance patterns during the second semester resulted in different students attending the school and less Grade 10 students being available to complete the test. In addition, the school was going through a transition period to align with the comprehension assessment of choice for most of the rest of the division, Edubest's Reading Comprehension Assessment Tool (RCAT). Teachers were beginning to explore these materials during the second semester to ensure successful administration the following year. The results derived from those written in the Fall showed that our school has maintained similar results to the previous year, which include large gaps in reading comprehension. Accommodations such as text-to-speech, speech-to-text, audio books, student choice and extra time were consistently offered to students throughout the school year to help address this concern. Setting a purpose for reading, linked to course assignments, before diving into a text and using textual evidence to support ideas were two of the primary strategies teachers focused on during the 2021-2022 school year, to improve comprehension.

Comments on Results

At the beginning of the 2021-2022, Lakeside Outreach School was going through a transition that included an entirely new administration team, an influx of students, issues around enrollment due to lack of established processes and a small group of grade 10 students who had irregular attendance. For this reason, the Math Intervention/Programming Instrument (MIPI) was not completed during the 2021-2022 school year at Lakeside Outreach School, and only had a response rate of 2 or 3 students in the couple years previous. Going forward a plan that makes sense for the realities of Outreach attendance will be put into place that ensures this assessment is completed with fidelity and responses are maximized. The MIPI will be made a requirement for Outreach students to access Math 10 coursework in the future.

Notes:

1. Data values have been suppressed where the number of respondents/students is fewer than 6. Suppression is marked with an asterisk (*).
2. "A" = Acceptable; "E" = Excellence — the percentages achieving the acceptable standard include the percentages achieving the standard of excellence.
3. Participation in the Diploma Exams was impacted by the fires in 2018/19, as well as by the COVID-19 pandemic in 2019/20, 2020/21 and the January 2022 Diploma Exam administration. 2019/20, 2020/21 and 2021/22 are not included in the rolling 3-year average. Caution should be used when interpreting trends over time.

Comments on Diploma Results

- Most of our Diploma assessment results are listed as suppressed due to having less than 6 students enrolled in Diploma level courses.
- For our English 30-2 Diploma results, we are pleased to see our results increased since the last time students wrote the provincial assessments in 2019. The results also scored higher than the Alberta percentage.
- Though our results were positive, we still believe that the difficulties surrounding Covid-19 and inconsistencies with education due to the pandemic over the last few years has impacted our quality of learning and assessment. Increased illness or time away from classes due to covid-19 symptom requirements, quarantine measures, created breaks in education. Our students' lost learning time has been a factor, as well as major switches from in-person learning to online. That being said, we do feel the alternate learning environment provided at LSO helped our students find more success compared to other more traditional school structures during the pandemic.
- Another factor to consider is that the Diploma assessment results was the lower weighting of 10% for the exams compared to 30% in the past years.

DOMAIN 2: TEACHING AND LEADING

Education Quality

Percentage of teachers, parents and students satisfied with the overall quality of basic education.

Comments on Results

With the student respondents having doubled since the previous school year, the percentage of these students who are satisfied with the overall quality of basic education has increased by over 10%. During the 2021-2022 school year, Lakeside Outreach School moved towards a semestered program and a more focused list of course offerings that could be tackled by the available teaching complement with greater fidelity. We also increased the use of technology in the classroom, evidenced by only using about half of the allotted paper for our school. Teachers at Lakeside Outreach School continue to have high expectations for students and it has become regular practice to provide students with feedback on assignments and allow opportunities to upgrade these assignments using the feedback to maximize learning.

DOMAIN 3: LEARNING SUPPORTS

Welcoming, Caring, Respectful and Safe Learning Environments

The percentage of teachers, parents and students who agree that their learning environments are welcoming, caring, respectful and safe.

Comments on Results

An increase in student respondents to the question of whether they agree that their learning environment is welcoming, caring, respectful and safe also led to an increase in those who responded positively to the survey. The school continues to provide wrap-around support services to students, including academic, career and wellness support, within a small intimate environment. Monthly student celebrations were held during the 2021-22 school year to recognize student achievement, leadership and citizenship, which was also promoted on social media. Flexible programming and scheduling is developed on a case-by-case basis to meet the socio-emotional and learning needs of Lakeside Outreach School students.

Access to Supports & Services

The percentage of teachers, parents and students who agree that students have access to the appropriate supports and services at school.

Comments on Results

Lakeside Outreach School maintained a high percentage of students who agreed that they have access to the appropriate supports and services during the 2021-2022 school year. In addition to ongoing teacher support, students were able to access a wellness coach for one-on-one counselling, and a career coach to discuss career pathways and post-secondary options as needed. A learning support teacher collaborated with teachers during the 2021-2022 school year to ensure Individual Student Plans (ISPs) were in place and inclusion needs were considered throughout the year, and a counselling consultant was able to advise the team, meet with students and families, and connect with other community resources when addressing some of our students' most complex socio-emotional needs. During the 2021-2022 school year, Lakeside Outreach School began to explore Jigsaw Learning's Collaborative Response Model and associated practices, as a way to ensure all students are receiving the supports they need and to build capacity of the school staff in addressing key issues.

Program of Studies - At Risk Students

	Percentage of teacher, parent and student agreement that programs for children at risk are easy to access and timely.

Comments on Results

The flexible nature of Lakeside Outreach School in meeting the needs of a diverse population of students, facing various life circumstances that make success difficult in the traditional school setting, allows the school to continue scoring very high to excellent when looking at the percentage of students who agree that programs for children at risk are easy to access and timely. We are able to provide students access and support with coursework both in-person and virtually, design learning plans and course-loads that work with students' current life commitments and schedule, provide quiet spaces to be productive in, ensure students have the technology and resources required to succeed, share timely feedback on course submissions that students can use to upgrade assignments, and bring community organizations and experts into our building to network and present to students on various social issues like bullying, addictions, anger/violence, financial wellness and more.

--

Inclusion – Pyramid of Intervention

HPSD supports inclusion through a multi-tiered approach. All students have a continuum of needs that can be met, to a varying degree, by differentiated instruction. School-based Learning Support Teachers (LSTs) engage in coaching conversations with staff regarding the ways and means of supporting a differentiated program of studies.

Each HPSD school annually reviews their pyramid of intervention to include:

- the universal, targeted and intensive supports available
- the process by which teachers collaborate to implement strategies [Response to Intervention]
- a display of the pyramid of intervention in a designated area where staff have easy access
- development of a network of supports to enable conversations about the progress of students

A divisional Educational Assistant committee was founded with representatives from each school. The representatives surveyed their school's educational assistants to determine areas of interest to support students and professional development opportunities to reflect local context.

First Nation, Métis, and Inuit Programming (Indigenous Education Coaches)

The Indigenous education coach has shifted its focus from a student-centered approach to a universal education model.

- The goal of this model is to ensure that all students will have a deep understanding of Canadian history, perspectives, treaties and land agreements, the legacy of residential schools, and the contributions of Indigenous culture in shaping our Canadian identity. It is meant to move future generation forward in creating a more inclusive Canada.
- This model will allow Indigenous learners to see themselves reflected in the curriculum. Classroom content across subject areas, from Kindergarten to grade 12 will be respectful, authentic and genuine, often including consultations with Elders and Knowledge Keepers.

Some of the events and activities that took place at Lakeside Outreach School during the 2021-22 school year, supported by High Prairie School Division's Indigenous education team included:

- Monthly coach-led professional development.
- Designing your shield presentation with Oneida Elder Ray John
- Nature & wellness presentation with Indigenous education coach Jamie Chalifoux
- Community wellness and reconciliation presentation with knowledge keeper Rod Freeman
- Indigenous graduates taking part in virtual sacred feather and sash teachings
- Land-based learning presentation and nature walk with Driftpile knowledge keeper Keith Laboucan

DOMAIN 4: GOVERNANCE

Comments on Results

Based on the student response, the percentage of those satisfied with the accessibility, effectiveness and efficiency of programs and services for students in their community has increased by 16% this past school year. During the 2021-2022 school year, Lakeside Outreach School worked closely with Roland Michener Secondary School to strengthen their partnership in addressing the learning needs of high school students within Slave Lake and the surrounding communities. The schools are sometimes able to partner up on shared learning experiences or field trips to make them more accessible to students and teachers and can collaborate on effective delivery of tier 3 supports to our most at-risk students. Lakeside Outreach School students are also able to participate in graduation, student leadership and athletic opportunities that exist at Roland Michener Secondary School. In addition, students are introduced to various community venues and services throughout the year through our athletics program, Jr. PD Day initiative and CALM Blitz event.
